Die τ , $\tilde{\tau}$ sind die Generatoren der SU(2) in der entsprechenden Spin-J-Darstellung (Dublets für LH Quarks, Singlets für RH Quarks, und allgemein für DM (Sie können für DM zunächst auch einfach ein Singlet annehmen)):

$$(\tilde{\tau}^1 \pm i\tilde{\tau}^2)_{kl} = \delta_{k,l\pm 1} \sqrt{(J\mp l)(J\pm l+1)},$$

$$(\tilde{\tau}^3)_{kl} = l\delta_{k,l},$$
(5)

with k, l running over the values $J, J - 1, \ldots, -J$.
